Why did you decide to join ENDietsS?

Except that I am very ambitious and always open to new ideas and challenges I strongly believe that I can learn something new in terms of experience from every single person that I meet and from every new surrounding I find myself in. Furthermore, apart from professional growth, this position will enable me to grow personally. It will allow me to shape a new perspective of the world, to solve problems more creatively, help me become an independent, decisive and self-confident person.

What would you like to achieve as an anchor?

European Network of Dietetic Students is a huge platform with incredible opportunity to rise, develop and give support to all the students around the Europe and further. Represent and lead such an impressive community is great privilege and on the other hand big opportunity to collaborate, spread ideas and knowledge. Also to inspire and encourage other students to accept new challenges, be more open-minded and share experience.

Let's collaborate. **LET'S MAKE THE DIFFERENCE!**
